Luké de Beer

Software Developer · Final-year Computer Science Student

Somerset West, South Africa · lukedebeer.ldb@gmail.com · 079 077 2123 · luke-de-beer.github.io · responsagility.me

PROFESSIONAL SUMMARY

Final-year Computer Science student at Stellenbosch University, graduating in December 2026, and technical co-founder of Responsagility, a behavioural-acuity platform live in production. I build full-stack products end to end, use AI extensively in development, and rely on thorough testing and review to keep the code reliable. Case studies of my work are on my website.

WORK EXPERIENCE

Technical Co-founder & Developer
Responsagility · responsagility.me **January 2026 – Present · Somerset West**

- Built the multi-tenant web platform and the iOS / Android daily-practice app from the ground up, owning the full software development lifecycle from design and database through testing, deployment and maintenance.
- Collaborate with my co-founder, who owns the behavioural model and content, to turn requirements into features.
- Live in production with real organisations, backed by a 1,500+ case automated test suite and migration-first releases.
- Full technical write-up: luke-de-beer.github.io/projects/responsagility.html

Freelance AI Evaluator
Outlier.AI **October 2024 – February 2025 · Remote**

- Reviewed and tested AI-generated answers and code, and wrote detailed feedback used to improve the models.

Job Shadowing · Stone Three & Mediclinic **2019 · Somerset West**

PROJECTS

OAuth 2.0 / OpenID Connect Server · Spatialedge · Software Engineering (CS344) · team of 6 **July – October 2026**

A sign-in server built without an OAuth library, plus a notes app that uses it, developed in an Agile team of six. I built the token, consent and signing-key endpoints, two-factor login and production deployment (TypeScript, Node.js, Docker).

Computer Networks Projects · Computer Networks (CS313) · team of 4 **February – May 2026**

Chat, reliable UDP file transfer, VoIP and peer-to-peer file sharing in Java. I wrote the chat server, the file-transfer protocol and the VoIP client, and added RSA and AES-GCM encryption.

Parallel Othello AI & Process Scheduler · Concurrency (CS314) · individual **February – May 2025**

An Othello agent in C that searches moves in parallel with MPI and alpha-beta pruning, plus a process scheduler simulator.

EDUCATION

BSc Computer Science · Stellenbosch University **2023 – 2026 · Graduating December 2026**

Marketing & Management Sciences · IMM Graduate School · First year completed **2022**

Mechatronic Engineering · Stellenbosch University · Transferred to Computer Science **2021**

Matric · Paul Roos Gymnasium **2020**

VOLUNTEER EXPERIENCE

Volunteer · Aitsa! After Care Centre · Assisted with activities and supported daily operations **2018**

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, Java, SQL

Frameworks & Development: React, Next.js, React Native, Expo, Node.js, Express, Fastify, JavaFX, MPI

Databases & Infrastructure: PostgreSQL, Supabase, SQLite, Drizzle ORM, Docker, Caddy, Railway, GitLab CI, Git

Security & Networking: OAuth 2.0 / OpenID Connect, JWT, TOTP two-factor authentication, RSA, AES-GCM, TCP/UDP sockets

Practices: Agile, software development lifecycle, CI/CD, code review, team collaboration

Testing: Vitest, React Testing Library, JUnit, unit and integration testing

AI-Assisted Development: AI-integrated development workflows, Anthropic and OpenAI APIs, custom Claude Code workflows
